

CARE & MAINTENANCE INSTRUCTIONS

It is recommended that all painting or staining of the doors is completed prior to installation of the door handles.

CHROME PLATED

To protect your handles we suggest cleaning the surface of your hardware periodically with a warm soapy lightly dampened cloth to remove any build-up of dust and grime that may cause corrosion and affect the integrity of the finish. Then simply dry thoroughly with a clean, soft cloth. Minimum of monthly cleaning of door handles is recommended for both finish preservation and general hygiene.

Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface.

If needed, a high-grade chrome polish may be used according to directions to clean and restore the original shine to the chrome finish.

Please avoid using any other metal polishes, abrasive cleaners, scorers or rough cloths that may damage or scratch the hardware and do not spray or immerse the hardware in liquid at any time.
