

CARE & MAINTENANCE INSTRUCTIONS

This range of handles is forged in Italy using the finest quality solid brass and arrive at Windsor in their raw state to be processed and hand finished.

To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand, by one of our specialist craftspeople, producing a collection of natural patina finishes.

These living finishes are designed to wear gracefully over time as the natural patina will gradually give way to an aged brass appearance in heavy use areas.

It is recommended that all painting or staining of the doors is completed prior to installation of the door handles.

ROMAN BRASS

It is recommended to clean the surface periodically with a damp soapy cloth to remove any build-up of dust and grime that may cause corrosion and affect the integrity of the finish. This finish can be preserved by very gently applying a thin oil layer to the surface from time to time. Wipe a thin layer of olive oil (or similar) over the handle, then with a clean cloth wipe again to remove any excess on the surface.
