

CARE & MAINTENANCE INSTRUCTIONS

It is recommended that all painting or staining of the doors is completed prior to installation of the door handles.

STAINLESS STEEL

To aid the longevity and appearance of quality Windsor stainless steel products, we suggest cleaning the surface of your hardware periodically with a warm soapy lightly dampened cloth to remove any build-up of dust and grime that may cause corrosion and affect the integrity of the finish. Then simply dry thoroughly with a clean, soft cloth. Minimum of monthly cleaning of door handles is recommended for both finish preservation and general hygiene.

Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface.

If tea staining does occur, to restore your stainless steel product to its original condition, apply a small amount of stainless steel polish onto the cloth and rub the surface along the grain (we recommend 'Blue Magic' – available from Windsor). Rub the affected areas until they are clean and the rust is removed, then wipe off the polish with a with a clean cloth.

Please avoid using a coarse material to re-brush the finish as this can create inconsistent lines on the product and affect the overall look.
