FITTING INSTRUCTIONS

a. Insert the mortice and fix with the two wood or aluminium screws provided into the top and bottom holes.

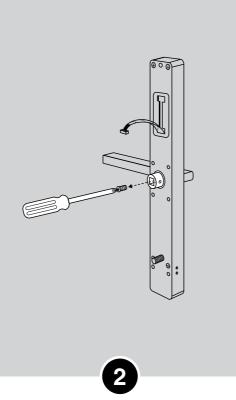

0

· CTT

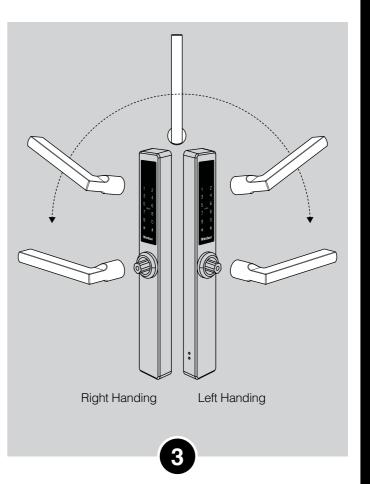

b. Insert the black bung into the middle hole.

- a. Remove the temporary screws from the back of each handle.
- b. Ensure the lever is handed to suit your door, the lever should be pointing towards the hinges.

← Scan me to watch a video of the fitting instructions

c. If the default handing is suitable for your door proceed to step 4 on the following page.

a. If you need to adjust the handing, remove the handle from the lock body and flip the lever so it is pointing towards the hinges of your door.

This will need to be done for both the front and back units.

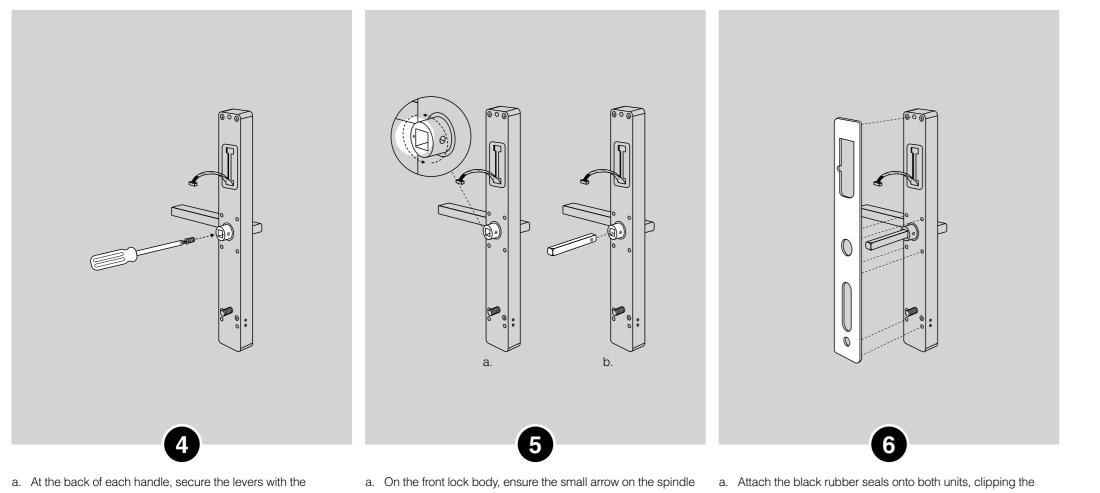

Package Contents

Product Measurements

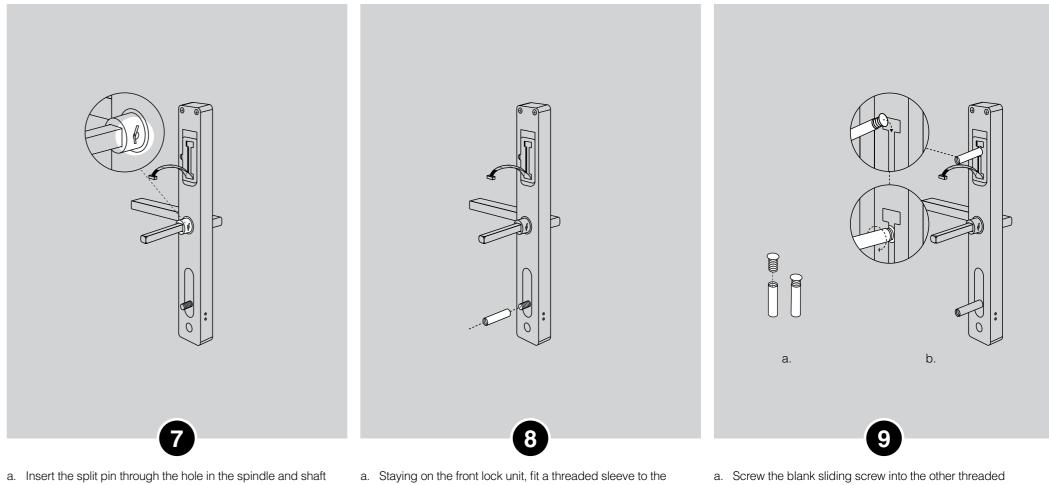

| Mortice Locks | | | |
|---------------|---------|-------------|------------|
| Code | Backset | Case Height | Case Depth |
| 1520 | 30mm | 174mm | 45mm |
| 1521 | 35mm | 174mm | 50mm |
| 1522 | 45mm | 174mm | 60mm |
| 1523 | 60mm | 174mm | 85mm |
| 1525 | 35mm | 218mm | 48mm |

| Lever Styles | | | | |
|--------------|-----------------|----------------|-------|-------------|
| Code | Body Height* | Body Width* | Lever | Protrusion* |
| 1501 | 310mm | 40mm | 130mm | 78mm |
| 1511 | 310mm | 40mm | 73mm | 78mm |
| 1512 | 310mm | 40mm | 73mm | 78mm |
| 1513 | 310mm | 40mm | 130mm | 78mm |

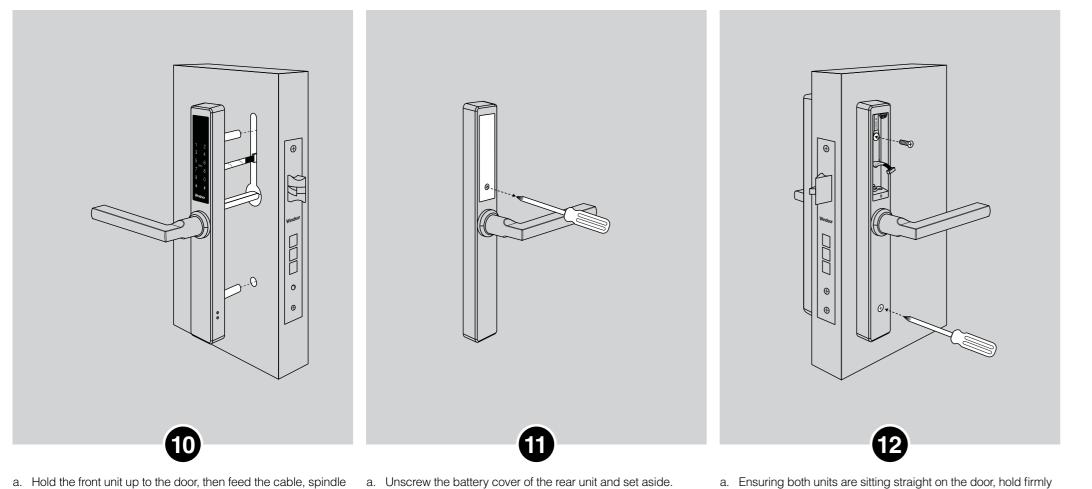

- provided M5 screws coated in blue Loctite on the thread.
- shaft is pointing to the hinges this is especially important if you have changed the handing of your lever. Refer to green sticker on the back of the front lock unit.
- b. Select which size of the provided spindles is suitable for your door thickness. Insert the chosen spindle into the back of the lever, the end with the through holes should align with the holes in the spindle shaft.
- rubber nodules into place.

FITTING INSTRUCTIONS

- and then splay ends to ensure the spindle does not fall out.
- bottom spigot and tighten. Ensure the indented end is fitted at the base.
- sleeve, leaving 3mm of the screw head proud.
- b. Insert the threaded sleeve into the top 'I' shaped cut out by tilting it into place. It should then freely slide so you can adjust the height depending on the mortice hole drilling (between 55–100mm from the center of the spindle shaft). Once in position tighten.

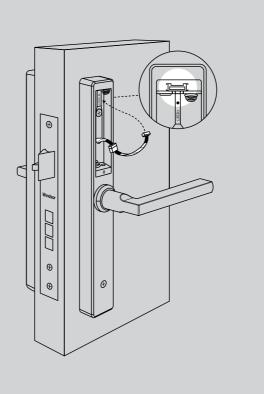

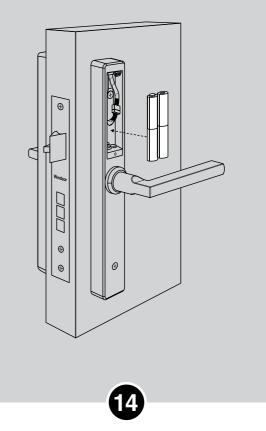

- and threaded sleeves through their respective cut outs.
- and secure the rear unit by tightening the screws into the threaded sleeves of the front unit.
- top of the rear unit.

13

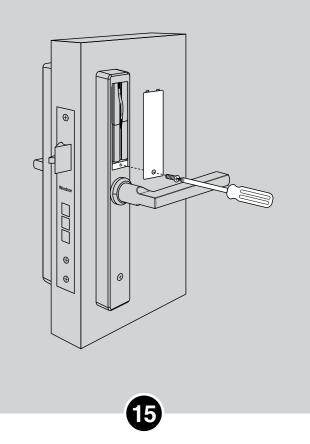

b. Push any excess cable back through the door cavity to clear from battery bay.

FITTING INSTRUCTIONS

- a. Connect cable extender and insert it into the cable port at the a. Insert the 4x AA alkaline batteries* (lock will chime to confirm a. Reattach the battery cover and secure with screw provided. it has been installed correctly).
 - * Warranty void if alkaline batteries are not used.

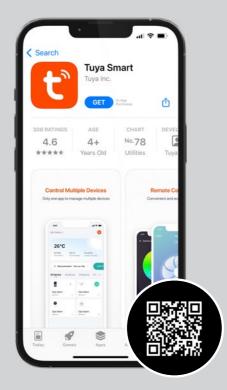

You are now ready to programme your lock. Please follow steps carefully and in chronological order.

> Note: for instructions on how to reset the lock to factory settings refer to pg. 38.

Whether you wish to control your Windsor Smart Entry independently or integrate with an existing smart home, the choice is yours.

INDEPENDENT INSTALLATION*

Download the black 'Windsor SMART' app by either scanning the QR code above or searching on Google Play or the Apple App Store.

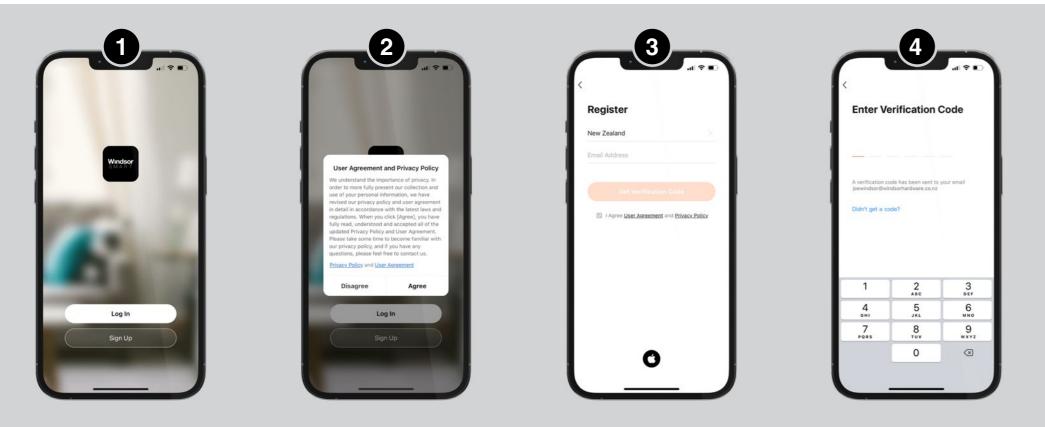

SMART HOME INSTALLATION*

Download the 'Tuya Smart' app by either scanning the QR code above or searching on Google Play or the Apple App Store.

Note: if you wish to connect your Windsor Smart Entry to a smart home system for example Google Home or Amazon Alexa, you will need to purchase the Windsor Wi-Fi Bridge. Once the chosen app installation is completed, turn on the device's Bluetooth and open the chosen app to begin pairing.

- > Note: your Bluetooth must remain on while using the app.
- > Note: the following instructions are applicable for both apps.

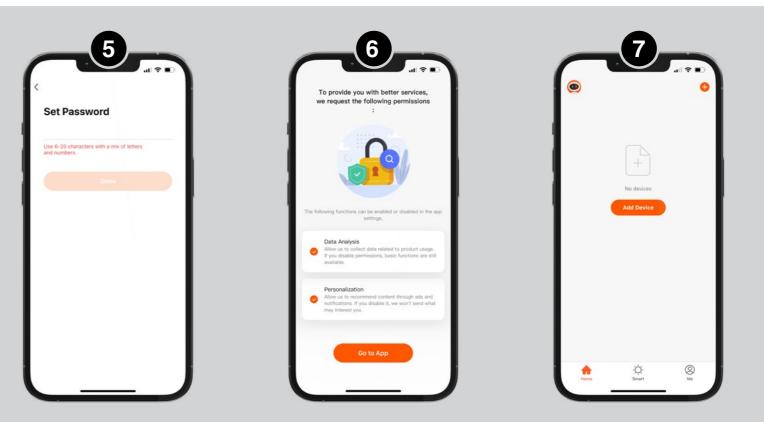

Account Set Up and Registration

1. To register open the app and select 'Sign Up.'

10

- 2. Please read and acknowledge the User Agreement and Privacy Policy before continuing the registration.
- 3. Register your location and sign up with a valid email address and select 'Get Verification Code.'
- 4. Input the verification code sent to your nominated email address.

5. You will automatically be prompted to set a password.

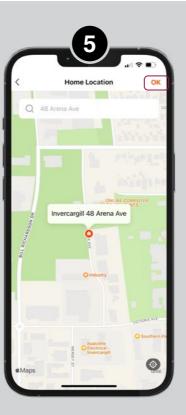

> Note: please ensure you keep your password and login details safe. However, if you do forget these, you can reset your password simply through your email verification.

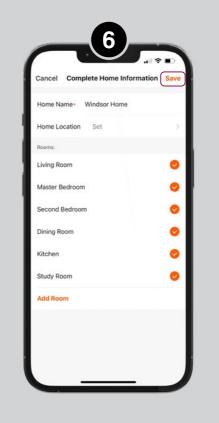

- 'Go to App.'
- 6. Review the permissions required and select 7. You are now successfully logged in to the Windsor SMART app.

Creating Your Home

| | 2 | 3 | 4 |
|------------|-------------------------------------|-------------------|---------------------------------------|
| • • | 8 0 | < Home Management | Cancel Complete Home Information Save |
| | Joe Windsor | (My Home) > | Home Name+ Windsor Home |

| 🚖 🔅 🛞 | Kane Smart Me | | |
| | | | |

- 1. In the main home screen of the app select 'Me'.
- 2. Select 'Home Management'.
- 3. Select the default home titled 'My Home'.
- Create a Home: You would select this if you are setting up a lock at another premise e.g Airbnb.
- Join a Home: You would select this if you are a attempting to join an existing home that has already been set up e.g. family member.
- Identify where the lock will be installed. Deselect any rooms where you have not installed a lock.
 Select 'Add Room' and enter the location(s) of the lock(s) e.g. Front Door and/or Garage.
 Then you **must** set your home location by selecting 'Set'.
- auto map

 Once you have named your home confirm the location on the map — this should automatically locate you, if not, scroll on the map to find your location. Then select 'OK'.

- Note: you can enter your address if you cannot find it on the map.
- Note: this location information is secure to your login and is not accessible by Windsor.

6. Now select 'Save' to complete your home set up.

Connecting Lock and App via Bluetooth*

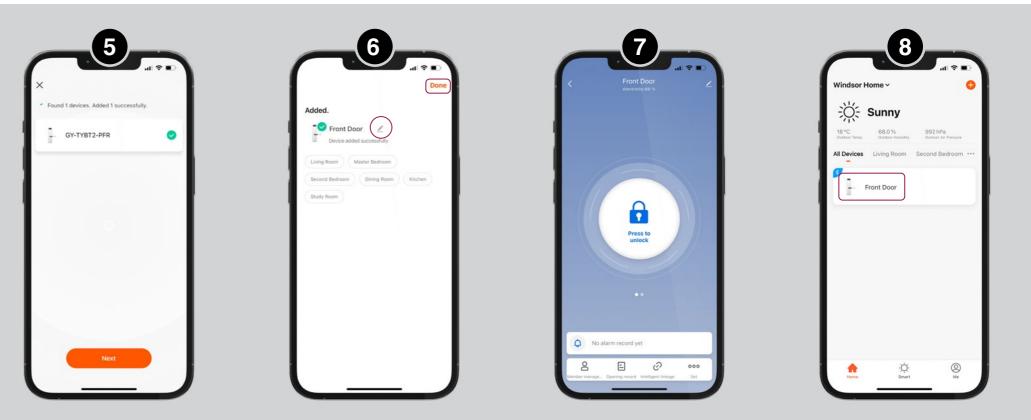

- 1. In the main home screen select 'Add Device'. 2. In the list of devices select 'Lock BLE'.
- > Note: to add more locks or devices to your app, select the '+' in the top right corner of the app home page.

3. You must complete a start-up reset on your device first. To do this press '8' then '#' on the lock keypad — the voice guide will say 'Activation Mode Engaged'.

Select the tick box 'Enable Bluetooth Network Distribution' then select 'Next'.

4. Once the device shows up, select the '+' and stay near the lock while it connects. This may take up to 30 seconds.

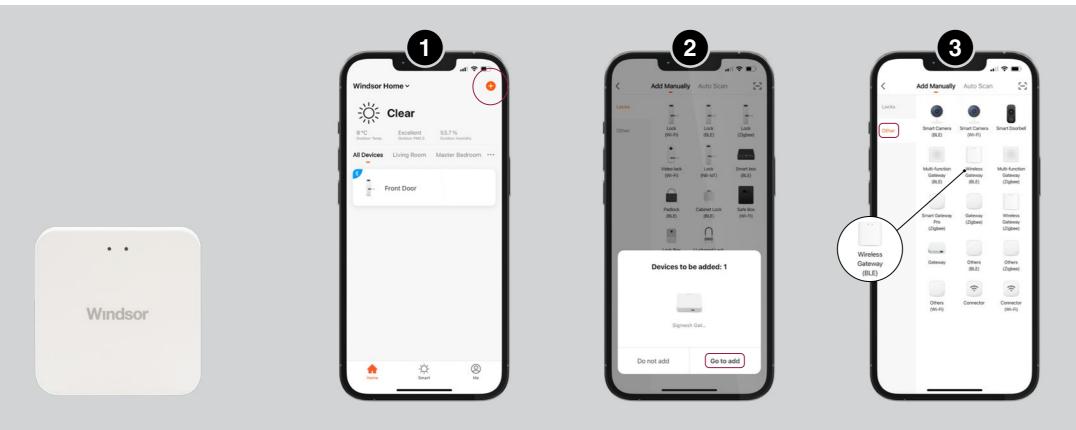

SET UP

5. Once the green tick appears, the lock has been successfully connected. Then select 'Next'.

- 6. You are now able to rename your lock by selecting the pen icon. Then select 'Done'.
- 7. The app will then show a blue screen this is the lock's home screen. From here you can manage all the functions of your lock.
- > Note: refer to pg. 25 for the user interface introduction.
- 8. Back in the main home screen, under 'All Devices', the lock you have just added will appear.

Connecting Wi-Fi Bridge to Your Phone*

WI-FI BRIDGE INSTALLATION

Plug the Windsor Wi-Fi Bridge into a power source close to your Wi-Fi router and within Bluetooth range of the lock (estimate 8–12m). The bridge needs to show the red light flashing slowly. If this is not showing, press the reset button by the power jack for 6 seconds to reset.

Note: ensure your phone or tablet is connected to the same 2.4ghz Wi-Fi network (not 5G) as what the bridge will be connected to.

CONNECTING THE BRIDGE TO YOUR PHONE

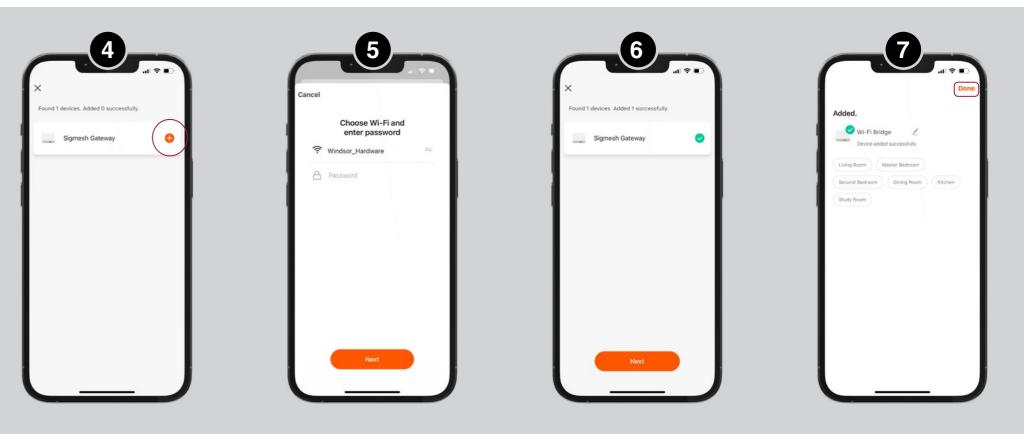

- 1. In the main home screen, select the '+' (it may be in the centre of the screen depending on the device used).
- 2. The bridge should appear in a pop-up box 'Devices to be added' called 'Sigmesh Gateway'. Select 'Go to add'.

If this pop-up does not show up, refer to step 3 to add it manually. Otherwise proceed to step 4.

3. Select 'Other', then select 'Wireless Gateway (BLE)'. This will search and show up the Wi-Fi bridge in range.

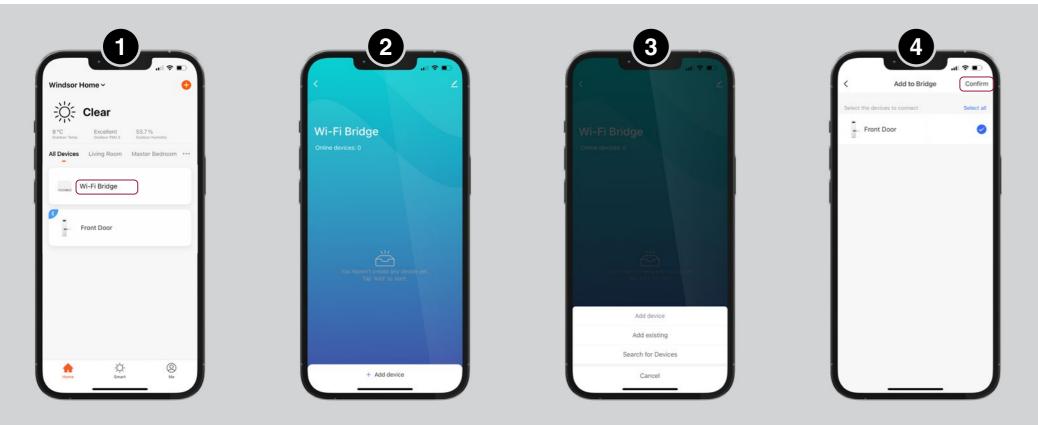

4. Select the '+' on the 'Sigmesh Gateway' bridge device.

SET UP

- 5. Add Wi-Fi details and password and select 'Next' and wait for this to connect.
- > Note: remember to connect to the same 2.4ghz Wi-Fi network (not 5G) as what your phone or tablet is connected to.
- 6. Once connected the green tick will appear then select 'Next'.
- 7. You are now able to rename your Wi-Fi bridge by selecting the pen icon. Then select 'Done'.
- > Note: for information on integrating with your Smart Home system refer to pg.9.
- > Note: you must now connect your lock to the Wi-Fi bridge please refer to the following page for instructions.

Connecting the Lock to the Wi-Fi Bridge*

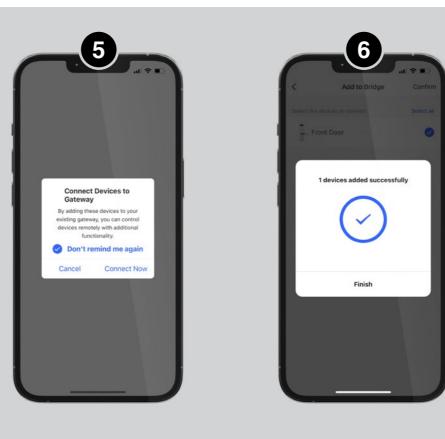

CONNECTING THE LOCK TO THE BRIDGE

1. Select your Wi-Fi bridge device in the main home screen.

2. In the blue bridge device screen select 'Add Device'.

3. Select 'Add Existing'.

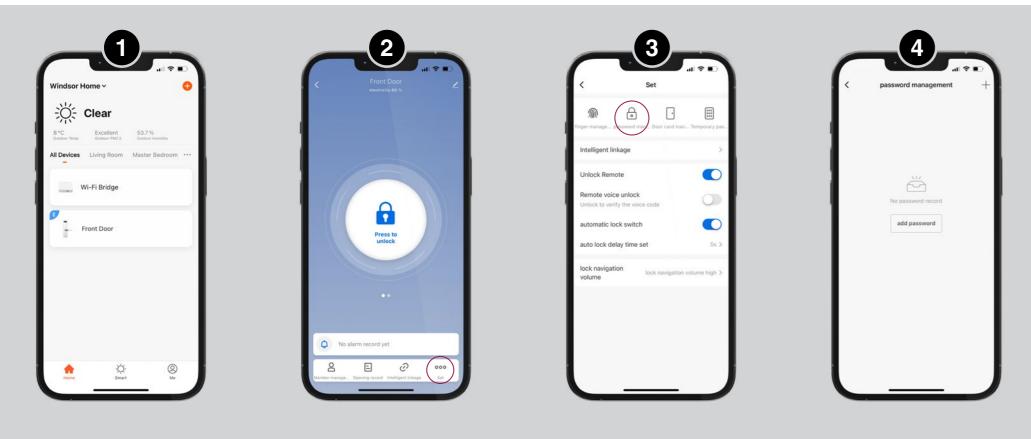

4. Select the lock you would like to add to the bridge and select 'Confirm'.

5. We recommend ticking 'Don't remind me again' then select 'Connect Now'.

6. Your lock is now connected to Wi-Fi via the bridge device, access this via the home screen. You will be able to unlock and manage your device on standard mobile internet network from any location with reception.

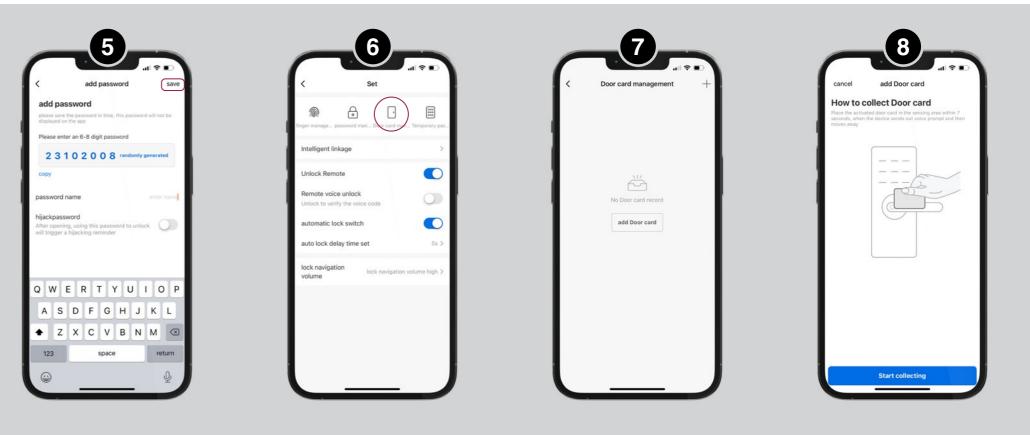

User Codes and Swipe Cards

- 1. Select your lock in the main home screen.
- 2. From the blue lock screen select 'Set'.
- > Note: you may need to press the centre lock button to ensure Bluetooth is connected to the lock while making changes within the app.
- 3. To add passwords select 'Password Management'.
- 4. Select 'Add Password'.

> Note: the fingerprint function is not available for use on the Windsor Smart Entry lock so you will not be able to use this function within the app.

SET UP

5. Enter a 6–8 digit password and give it a name then select 'Save'.

6. To add cards select 'Door Card Management'.

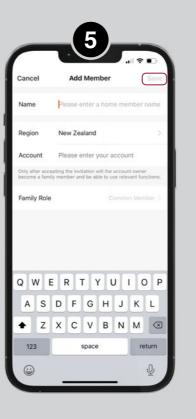

7. Select 'Add Door Card'.

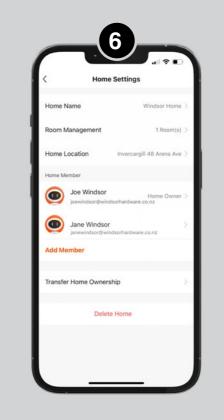

8. Select 'Start Collecting' then follow the prompts with your door card.

| From the Me screen select 'Home Management'. | 2. Select your home. | Under the Home Member section select 'Add Member'. | Select the method to share the details to the user. |

> Note: before adding other app users, it is recommended they first download the Windsor Smart app and have created an account.

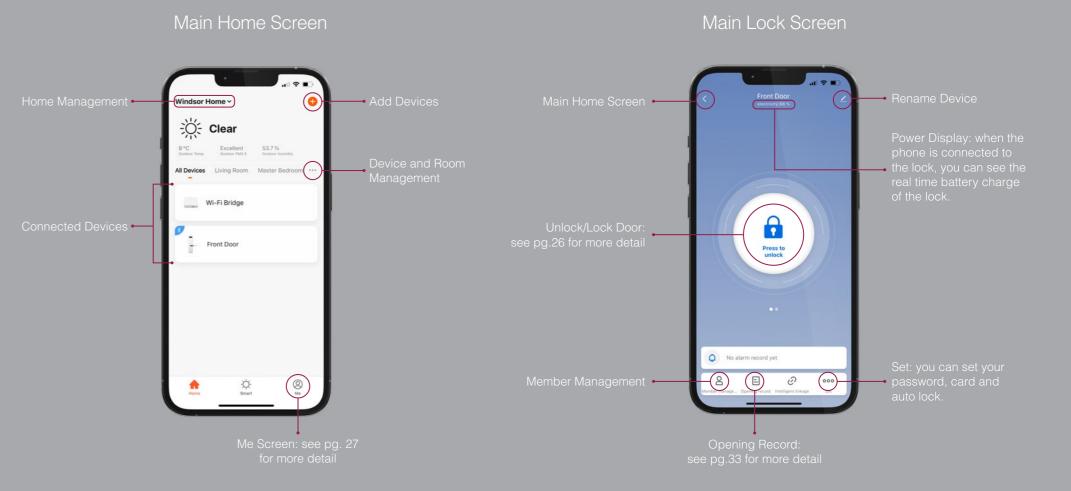

5. Enter their details and select their family role, then select 'Save'. They will receive a notification to activate their access.

> Note: for more information on family roles see pg. 38.

6. They will now appear under the Home Member section of the Home Settings screen.

USING THE APP

Lock and Unlock – App, Keypad, Card or Key

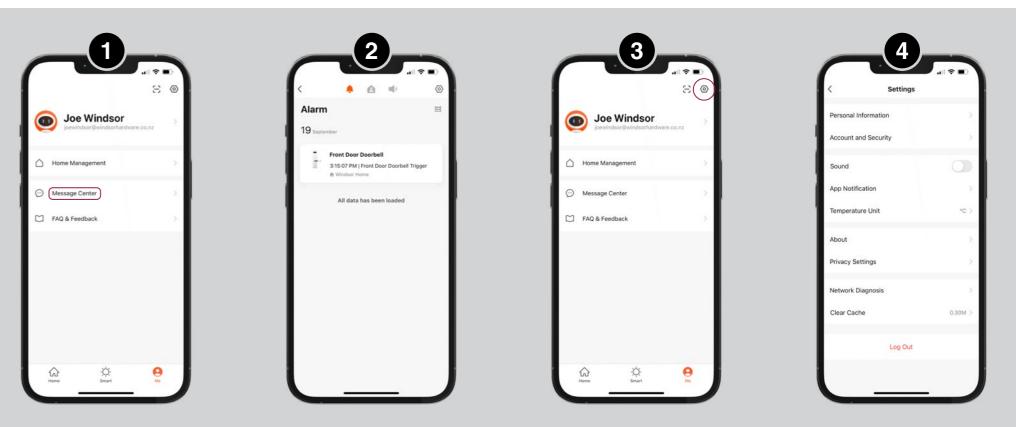

- > To unlock using the app, in the blue lock screen, press and hold the large padlock icon for 1–2 seconds until the blue outer ring becomes orange as pictured above.*
- > To unlock via the keypad, touch to activate, enter your code followed by '#'.*
- > To unlock using the card, simply hold the card up to the centre of the keypad.*
- > To unlock using the key, insert the key in the base of the lock unit on the front of the door. Turn to unlock (removing the key will lock the door).*
- > Note: if you leave the key in the lock body in the unlock position it will stay unlocked

- > Note: for added security lift the lever up to throw the bolt, it will then retract the next time you unlock the door.
- * Every time after unlocking, your door will remain unlocked for 5 seconds before self-locking again (unless you turn the automtic locking off). You can adjust the auto lock time after set up refer to pg. 30 for more information.

My User 'Me' Overview

1. In the Me screen, the settings and Message Centre can be accessed. 2. The Message Centre is where the alerts and notifications are located, as well as the usage data log and alarm settings.

The icons along the top navigation bar are for the below notifications:

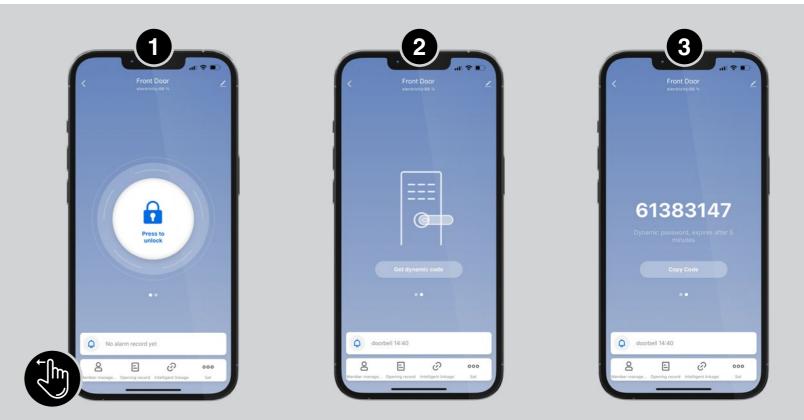

- Alarm notifications
- A Home messages
- Bulletin messages

- 3. While in the Me section select the cog icon to access your settings.
- . Here you can access your personal - 4 information, general app settings, privacy and cache settings.

BONUS FEATURES

Dynamic Code

Need someone to feed your pets while you're away but don't want to leave a key out?

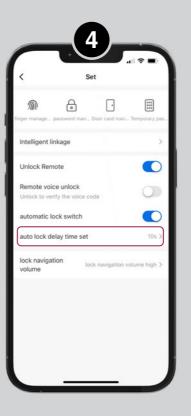

- 1. From the blue lock screen, swipe left.
- 2. Select 'Get Dynamic Code'. This will generate a random code for the lock that will be valid for the next 5 minutes only before it expires.
- 3. You can simply copy and send the code to someone via text message or other messaging service.

Automatic Lock Switch

Want to quickly pop out and check the mail without the door locking behind you?

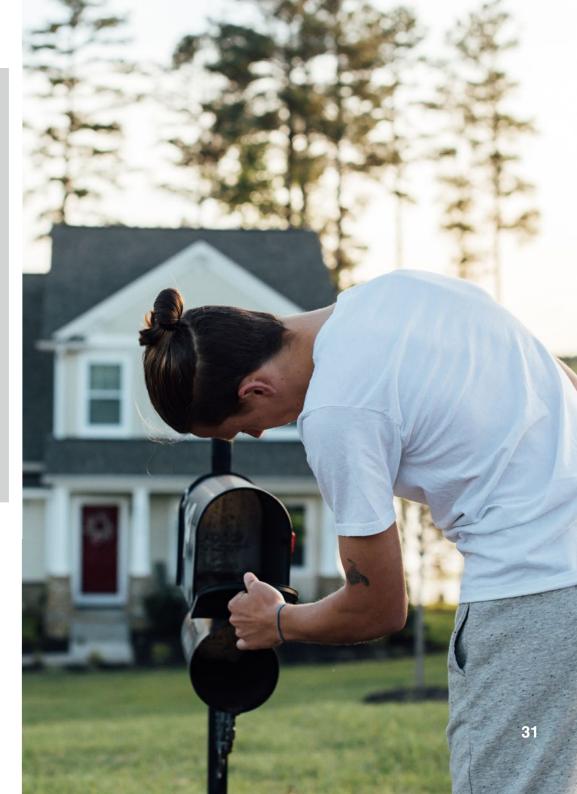

1. From the main home screen select your lock. 2. From the blue lock screen select 'Set'. 3. Toggle on the automatic lock switch.

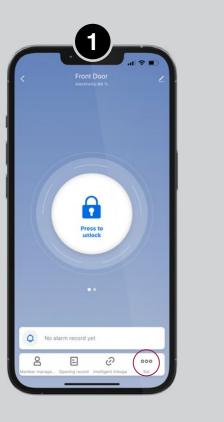

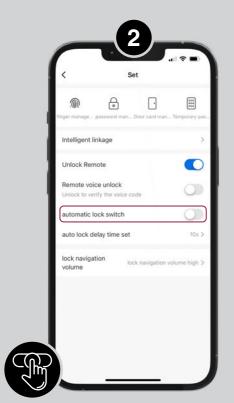

4. Once the automatic lock switch is on, select 'auto lock delay time set' to set the preferred delay time.

5. Once you have set the delay time by selecting 'Confirm', the lock will go into passage mode for the set amount of time allowing you to complete a task e.g. getting the mail in.

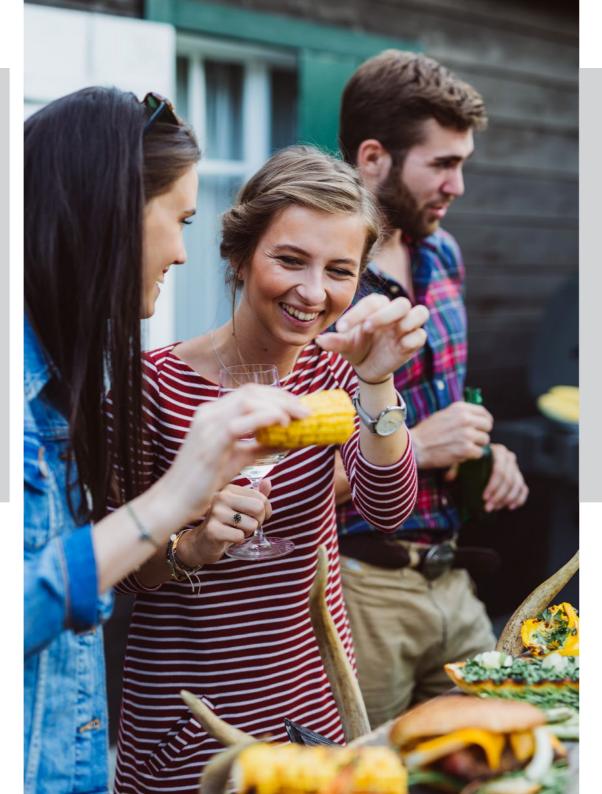

Passage Mode

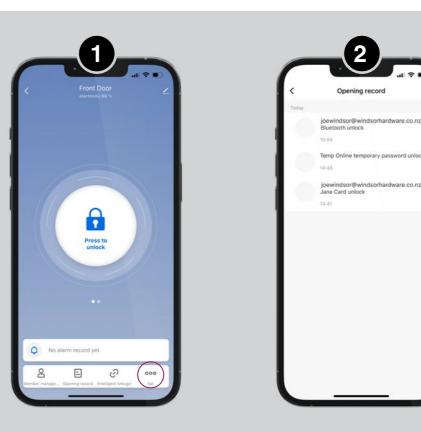

Freedom to give that indoor outdoor flow without having to unlock the door frequently.

- 1. From the blue lock screen select 'Set'.
- Note: when the lock is in passage mode you can also hold down the '*' key and lock it from the keypad.
- 2. Toggle off the 'automatic lock switch' then unlock the door using any unlock method, this will then activate passage mode.
- Note: to deactivate passage mode simple toggle the switch back on.

Keep track of who is coming and going in your home with the opening record feature.1. From the blue lock screen select 'Set'.2. The records are displayed in real time and

Opening Record

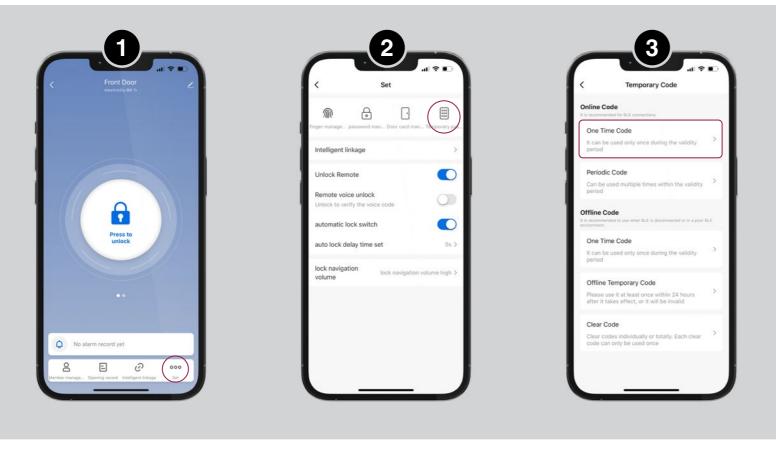

- 2. The records are displayed in real time and chronological order and are labelled as the assigned username or unique identifier e.g. Plumber/Housesitter.
- Note: if using Bluetooth the records will only show when you are within Bluetooth range and connected to the lock.

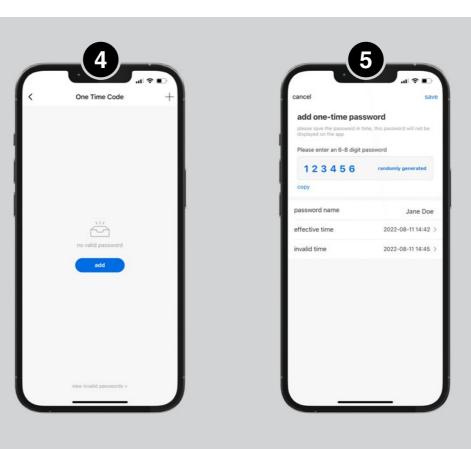

One Time Code

Have a plumber calling in to fix your tap while you're at work? Save the dash home to meet them and unlock the door.

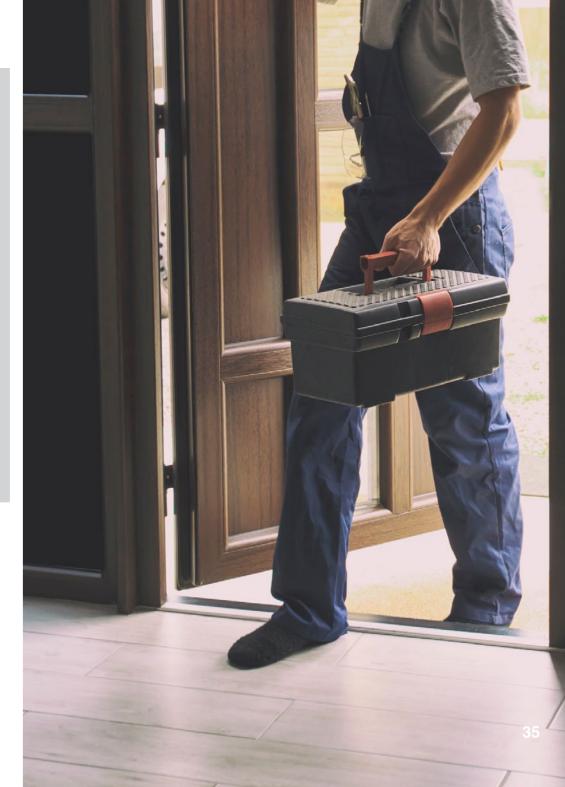

- 1. From the blue lock screen select 'Set'.
- 2. In the Set screen select 'Temporary Passcode'.
- 3. In the Temporary Code screen select 'One Time Code'.

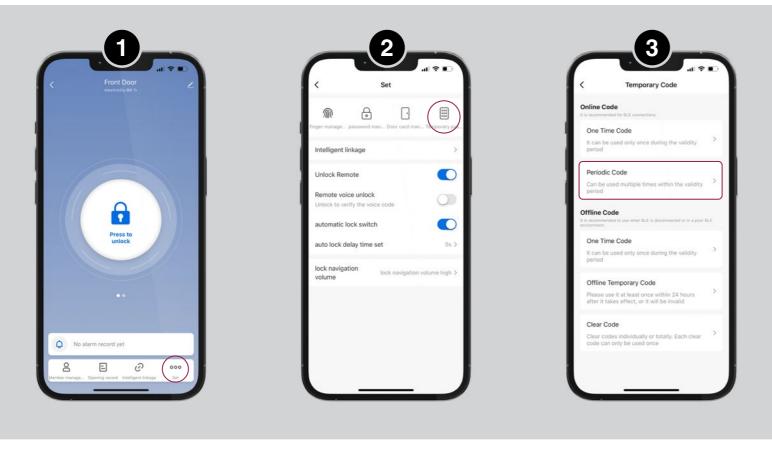

4. In the One Time Code screen select 'Add'.

- 5. The app can randomly generate a password or you may create your own. Name the password with an unique identifier e.g. Plumber/Housesitter. Ensure you set the time period the code will be valid for. If the code is used outside of that timeframe it will be deactivated.
- > Note: remember this code is valid for one use only.

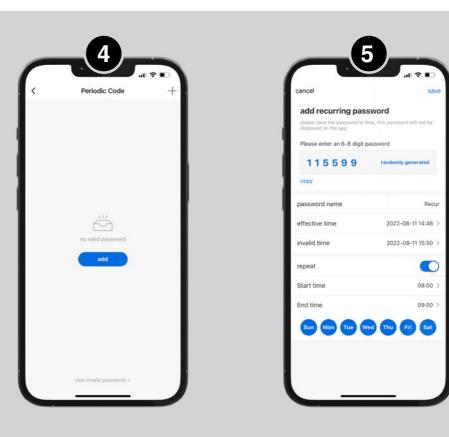

Periodic Code

Grant an Airbnb guest access for a short period of time with a definitive start and end date.

- 1. From the blue lock screen select 'Set'.
- 2. In the Set screen select 'Temporary Passcode'.
- 3. In the Temporary Code screen select 'Periodic Code'.

4. In the Periodic Code screen select 'Add'.

5. The app can randomly generate a password or you may create your own. Name the password with an unique identifier e.g. Airbnb guest name. Ensure you set the time period it will be valid for, if it is used outside of that timeframe the code will be deactivated. Once set up, this code may be used as many times as required within the assigned timeframe.

Changing Home Roles

Have a new flatmate moving in and need to add a new person to your home?

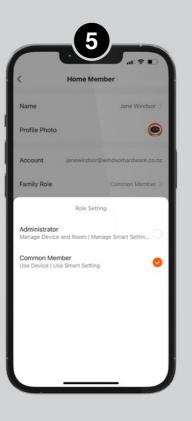

CHANGING HOME MEMBER ROLES

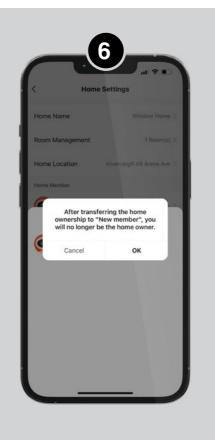

1. In the Me screen select 'Home Management'. 2. Select the specific home (if more than one

2. Select the specific home (if more than one unit is managed on the app).

- In the Home Settings screen, select the member you would like change the status or adjust the permissions for.
- Select 'Family Role' to change permissions or select 'Remove Member' to remove a user from your home.

 After selecting 'Family Role' you can change the user to either an 'Administrator' or 'Common Member'.

 Note: to change home ownership to a different user, you will need to change their status to 'Administrator' first.

CHANGING HOME OWNERSHIP

Refer back to the Home Settings screen in step 3, it will show 'Transfer Home Ownership' under the Home Member section. Select this and change full ownership rights, management and permissions to the user you select.

Note: the new owner will get a notification advising the home ownership change.
