40 YEARS

Peter Hickmott, a fitter and turner by trade, needed a pull handle for his front door, but couldn't find exactly what he had envisioned, so decided to engineer his own.

He approached Smith City Market for feedback and they commended his efforts, but their real need was brass cabinet knobs. Peter agreed to meet their request and the first Windsor Brass order was placed.

1980s

During late nights and early mornings, Peter tirelessly crafted the cabinet knobs in a backyard garage utilising a friend's lathe. Expanding to D cabinet handles, he then began to secure joiner customers in Christchurch and Auckland.

By 1986, a pivotal order led him to resign from his day job at CWF Hamilton's, fully committing to Windsor Brass.

After extensive research and experimentation in 20L buckets we created our first special finish, Antique Bronze.

Two years later he transitioned from the home garage to our inaugural industrial premises, hired our first employee and launched our first range.

1990s

Windsor began importing superior brass enabling the ability to offer a full suite of architectural hardware.

Faced with increasing demand, in 1991 Windsor moved to a larger premises employing further staff and established a sales team.

Two years later Peter and Rose Hickmott relocated the business to Invercargill.

2000s

2003 was a pivotal moment where we introduced our first volume builder and Brushed Nickel range, Astron. This expedited significant growth by entering a new market, continuing to expand our range and customer base, resulting in our third rebrand.

2010s

With a workforce of 20 employees geared for expansion, we moved into our current purpose-built facility.

Our finish offering grew including our signature hand finishes, but this decade also saw the introduction of the popular Matt Black and Graphite Nickel finishes.

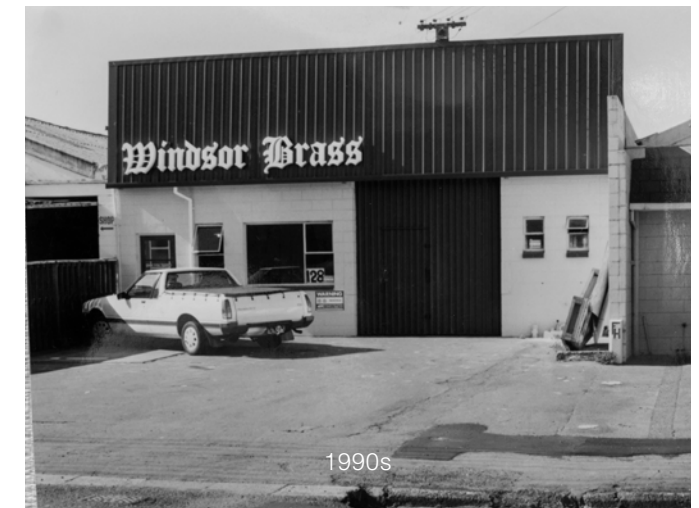

The brand evolved from Windsor Brass to Windsor Architectural Hardware incorporating our extensive product range and market offering.

2020s

Our team structure underwent a significant change bringing new expertise in-house including global sales, marketing, IT, HR and accounting.

This laid the foundations to expand to Australia and in 2022 we employed our first Australian sales rep.

Exceptional customer service and quality products has always been at the core of what we do, and we'd like to thank our loyal customers for trusting in Windsor for the past 40 years!

DISASSEMBLED WINDOW HARDWARE
BEING PROCESSED INTO DARK ROMAN BRASS

BESPOKE HAND FINISHES

Our signature collection of bespoke hand finishes has been honed over four decades of perfecting its true artisan form.

They've always been a labour of love which began with dipping cabinet knobs in 20 litre buckets in the backyard to apply a lacquer and curing them in the family living room. Over time processes were refined, trends evolved and our collection grew.

Our hardware is forged and machined using the finest quality solid brass arriving at Windsor in a natural, raw state—a blank canvas ready to take on a new look.

To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand by our team of specialist craftspeople.

Some finishes are left in their natural state to age gracefully over time, these are our living finishes, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes.

Door accessories, window hardware and pull handles are batch processed for precise colour coordination.

From our hands, to yours.

HALF MOON PULL HANDLES FROM SOLID BRASS
IN A BESPOKE BRASS FINISH TO MATCH CLIENT TAPWARE

CUSTOM PROCESS

Consultation

Contact us to schedule a consultation where we can discuss your unique requirements for custom door handles.

Design Proposal Review

Once we've collaborated on the design, you'll have the opportunity to review and approve the proposed design before we proceed.

Material and Finish Selection

Choose from our range of materials and finishes to ensure your custom door handles perfectly match your aesthetic preferences.

Quotation and Approvals

After finalising the design, you'll receive a detailed quote outlining the costs, and upon acceptance, we'll proceed with payment arrangements.

Production

Our skilled craftsmen will then meticulously craft your door handles according to the approved design and specifications.

Quality Assurance Check

Each handle undergoes a thorough inspection process to ensure it meets our standards of quality and craftsmanship.

Delivery

Once completed, your custom door handles will be carefully packaged and promptly shipped to your specified location.

Installation Instructions

Upon arrival, follow our detailed instructions to ensure a smooth and hassle-free installation process.

ENTRANCE HARDWARE

First impressions are just as important when it comes to your front door—make a statement with your entrance hardware and set the scene of luxury as it weaves through the rest of your home.

This collection of pull handles is constructed from solid brass and hand finished.

VERGE - DIAMOND KNURLED LEVER ON LONGPLATE
IN GRAPHITE NICKEL

WINDSOR FINISHES

Brushed Nickel

Nickel electroplating is made up of several layers of colour then brushed and finished with a gloss clearcoat to protect the finish. Applied to brass, stainless steel, zinc alloy and aluminium dependent on the item.

Satin Chrome

Satin Chrome is derived from a heavy chrome electroplate that is brushed back to achieve a consistent and seamless matt finish.

Matt Black

Matt Black is a bold finish and resembles a deep midnight tone. The finish is applied with electroplating, with some items powdercoated to achieve matching finishes across the range.

Graphite Nickel

Graphite Nickel resembles tones similar to 'gunmetal' and offers a softer look than black whilst still adding texture and depth to a home.

Matt Satin Brass

An elegant brushed brass finish that emits a soft luminous sheen through the added matt lacquer.

Antique Bronze

A traditional bronze finish with shades of rich chocolate and protected with a gloss lacquer. Often used in heritage homes as complements natural wooden doors and windows.

Polished Brass

A timeless classic, this mirror finish coordinates well with many other fixtures in the home and can appear traditional or modern depending on the lever style it is applied to.

Dark Roman Brass

A smoky charcoal finish that after bronzing is rubbed back by hand to achieve lighter caramel edges that radiate through like twilight adding depth to your colour palette.

Natural Bronze

Warm autumn hues that bring through texture similar to stone. This unlacquered finish is left to patina naturally over time.

Oil Rubbed Bronze

This finish offers bronze tones varying from a dark truffle through to champagne by hand rubbing the hardware with oil to achieve the natural patina appearance.

Roman Brass

A medium toned bronze finish that depicts shadows of dusk. It is rubbed back by hand and left to patina naturally over time.

Rumbled Brass

Our most textured finish, this medium brass tone is favoured for its perfect imperfections.

Unlacquered Brass

A luxurious golden colour with the same distinctive honey look as Polished Brass but non-lacquered. This is brass in its raw and natural form.

Unlacquered Satin Brass

This brushed brass finish is more subtle than its lacquered counterpart and offers a soft lustrous sheen that will age naturally.

Powdercoat

We powdercoat using colours from the New Zealand Dulux Powders Range.

PROJECT HIGHLIGHT

Project Hicks Cottage

Hardware Italian Charleston in Oil Rubbed Bronze

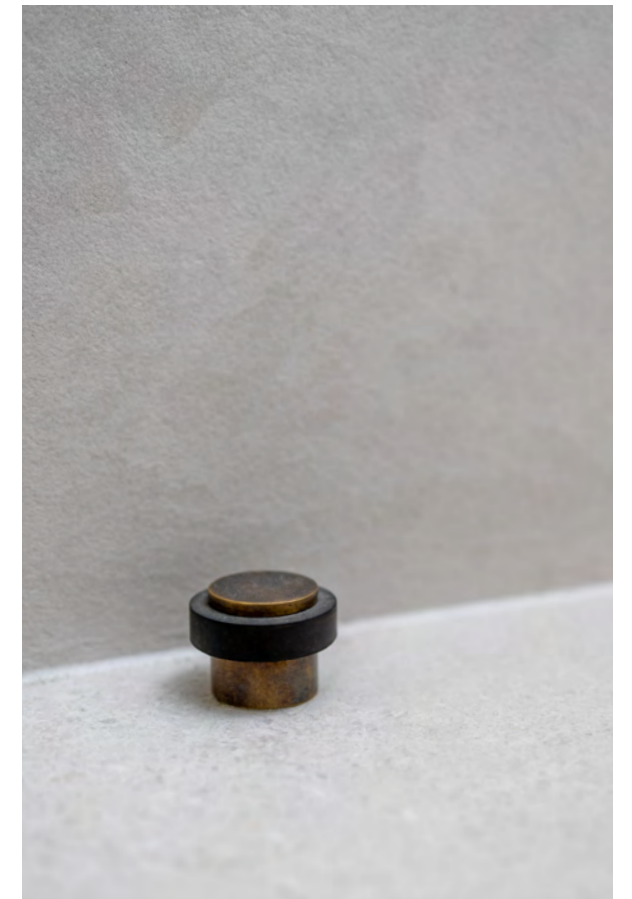

Location Queenstown, New Zealand

Nestled within the scenic Shotover Country (a short drive from Windsor head office) the once-dilapidated 1867 cottage, crafted by pioneer Thomas Hicks, stands as Queenstown's heritage landmark. Formerly a shearing shed and draught horse haven, this Category 3 listed historic gem has undergone a remarkable transformation, orchestrated by a visionary interior designer and builder/owner. Preserving its pioneering legacy, meticulous efforts were undertaken. The iconic timber shingles roof, symbolizing its historical significance, was safeguarded under a new iron layer treated with hydrochloric acid for an authentic patina. A crumbling rubble stone chimney, rebuilt using local river stones, mirrors the original 1870s pattern.

This extensive project included lifting and placing the cottage on concrete blocks, revealing original wooden roof shingles and incorporating new cedar weatherboard clad with old beech sarking. A new front door and window frames were added, replicating the originals. Seamlessly blending modern luxury with historical charm, the interior offers first-class accommodation through Hello Guest, inviting visitors to reconnect with Queenstown's captivating history and beauty. The Oil Rubbed Bronze finish ties into the rest of the tapware and fittings used throughout the cottage, while the Charleston lever style adds a modern edge, beautifully matching the Buddy Tapware in Aged Brass Organic from Plumline NZ.

Scan the below QR code for more projects.
